SUNGARD TO ACQUIRE VERICENTER

Wayne, Pa., July 16, 2007—SunGard (<http://www.sungard.com>) today announced that it has reached a definitive agreement to acquire VeriCenter, Inc., a provider of managed hosting, colocation, and infrastructure services. VeriCenter will become part of SunGard Availability Services, the pioneer and leading provider of information availability and business continuity services. The transaction, the terms of which were not disclosed, is not expected to have a material impact on SunGard's financial results.

The addition of VeriCenter increases SunGard's economies of scale. It also broadens SunGard's service offerings that combine dedicated and shared resources tailored to specific customer information availability needs. The VeriCenter resources complement SunGard's business continuity and production hosting solutions that maximize the availability of networks, systems, data and applications.

"Companies have a decreasing tolerance for IT system downtime to avoid business disruptions, and budgetary pressures require them to look for vendors that can increase IT availability in a cost-effective way," said Ted Gaasche, chief executive officer of SunGard Availability Services. "The powerful blend of SunGard's deep portfolio of information availability services, VeriCenter's strong facility footprint and the world class expertise of our combined team will further enhance the ability to help protect customers' mission-critical people, systems and applications."

Founded in 1999, VeriCenter serves more than 600 customers with complex requirements and significant uptime needs. VeriCenter hosts business applications, Websites, Software-as-a-Service,

and messaging and collaboration applications from a nationwide network of seven data center facilities.

An acquisition by SunGard Availability Services will give VeriCenter customers access to a much broader range of business continuity, consulting and managed services to support their IT requirements.

Gray Hall, chief executive officer of VeriCenter, commented, “SunGard is a best-in-class business continuity services provider and it has a rapidly growing managed services business. More of VeriCenter’s customers seek a total availability solution from a single vendor, and combining our managed services delivery with SunGard Availability Services will help meet this need. Together, we can serve customers that seek business continuity, managed services or the blend of the two.”

Once the acquisition is finalized, SunGard Availability Services will serve more than 10,000 customers in nearly four million square feet of operations space predominantly in North America and Europe. Much of VeriCenter’s nearly 470,000 square feet of operations space remains untapped. SunGard Availability Services can customize the construction at each site to satisfy customer demands for managed services and business continuity to support customers.

About VeriCenter

Founded in 1999, VeriCenter is a managed services, application hosting, and IT infrastructure company. VeriCenter has built a reputation for business leadership and industry vision. VeriCenter is the recipient of prestigious technology and industry accolades. Recently, VeriCenter has been honored as a 2006 *Inc.* 500 fastest-growing private company for the second year in a row, marking the distinction as a first for a managed services and infrastructure outsourcing company. The company is also a five-time winner of the Houston Fast Tech 50, which honors the 50 fastest growing technology companies in the Houston area.
